

GETTING STARTED GUIDE

MTGROGUE

Quick Start

Prepare a campaign and run the first attempt

Public Release v1.0

Synchronized with the MTGRogue v1.0 assistants

For a GM and players who already know Magic: The Gathering

31 JULY 2026

MTGRogue is unofficial Fan Content permitted under the Fan Content Policy. Not approved or endorsed by Wizards. Portions of the materials used are property of Wizards of the Coast. © Wizards of the Coast LLC.

01 Before You Begin

MTGRogue is a guided one-on-one Magic campaign. The player's deck develops across repeated runs while the Run Assistant manages draws, the economy, encounters, and progression. Magic games use the normal rules agreed on by your group, supplemented by the campaign rules below.

Project tools

Campaign Start Assistant: creates the initial permanent card pool. **Deck Draw Assistant:** selects opponents. **Run Assistant:** manages the Command Zone, rewards, shops, and progression. **Moxfield** is optional for card-pool and deck management; **Cockatrice** can be used to play encounters.

Minimum preparation

1. Open MTGRogue_Campaign_Start_Assistant_v1.0.html and generate the player's initial permanent card pool.
2. Copy the generated card list into MTGRogue_Run_Assistant_v1.0.html when starting the campaign.
3. If the player wants to manage the card pool and build decks on Moxfield, create a dedicated account with an empty collection and record only the MTGRogue permanent card pool there.
4. Install Cockatrice, run Oracle to download the card database, then prepare decklist imports.
5. Keep the default settings for a first session. Duplicate prevention is enabled and Instant Deckbuilding targets 35 cards from the permanent card pool.
6. Prepare opponent decklists with MTGRogue_Deck_Draw_Assistant_v1.0.html.
7. Keep the GM's Guide nearby; Reference and Appendices is mainly for exact values and troubleshooting.

Companion software

Tool	Use in MTGRogue	Address
Moxfield	Optional: record the permanent card pool in Collection and build decks. Use a dedicated empty account; an existing personal collection would blur the campaign card pool.	moxfield.com
Cockatrice	Import decklists and play encounters. After installation, run Oracle to install the card database.	cockatrice.github.io

Card language

French Mode has no universal recommended setting. Choose Disabled, Moderate, or Strict according to your group and the availability of French printings.

02 Choose the Player's Deck

1. Select the Command Zone

The assistant proposes commanders and automatically resolves Partner, Choose a Background, Partner with, Friends forever, and Doctor's companion combinations. A Background is never offered on its own.

2. Choose a deckbuilding style

Style	Use it when...	Rule during the run
Freeform	the player wants to build the list manually	gained cards may move into or out of the deck outside combat
Instant — Mixed	the player wants a ready-to-play list	the generated base is fixed; only cards gained during the run are freely exchangeable
Instant — Card Pool	the player does not want rented cards	the same restriction applies, without nonbasic EDHREC rentals

The main deck normally contains 99 cards with one commander, or 98 cards with two Command Zone cards. Permanent reductions can lower this total to a floor of 60.

03 Play a Run

1. At the beginning of the run, announce only the tool received and resolve its effect at the indicated time.
2. Load the next opponent in the Deck Draw Assistant and play the encounter.
3. After a victory, record the result, receive gold, and resolve any reward, event, and shop in the order shown.
4. Add gained cards to the run sideboard. The player may move them into or out of the deck at any time outside combat.
5. Continue until defeat or until the campaign is completed.

While loading

Do not start two draws at the same time. Leaving a shop before it finishes loading cancels the active request; wait for the next screen to settle before starting another action.

Contracts

A contract is an optional handicap selected before an encounter in exchange for bonus gold if the player wins. Contracts do not level up: Minor, Major, and Extreme tiers unlock separately for each exact boss after 1, 2, and 3 previous victories against that boss. The assistant draws one random drawback for each unlocked tier and calculates the bonus.

04 End the Run

1. Resolve the End of Run screen and select the cards that join the permanent card pool.
2. The normal limit is 3 cards, increased by Inheritance. Once the limit is reached, other boxes are disabled and become available again when a card is deselected.
3. Confirm the selection before returning to the Skill Tree.
4. Spend gems, check the new minimum deck size, and export a backup.
5. Start the next run with the new Command Zone or deck planned for your campaign.

Campaign end

The public campaign contains 38 encounters and ends after defeating Current Vintage.

05 First-Session Checklist

- Initial card list generated and entered in the Run Assistant.
- Opponent decklists available.
- Command Zone and deckbuilding style selected.
- Player deck checked before the first encounter.
- A JSON backup exported at the end of the session.
